

Workspace Environment for Collaboration in Small Software Development Organization

Mishra, D (Mishra, Deepti)^[1]; Mishra, A (Mishra, Alok)^[1]

Abstract

Effective collaboration and communication are important contributing factors to achieve success in agile software development projects. The significance of workplace environment and tools are immense in effective communication, collaboration and coordination between people performing software development. In this paper, we have illustrated how workplace environment, collaboration, improved communication, and coordination facilitated towards excellent productivity in a small-scale software development organization.
