

Comparative Study of Cognitive Complexity Measures

Misra, S (Misra, Sanjay)^[1]; Akman, I (Akman, Ibrahim)^[1]

Abstract

Complexity metrics are used to predict critical information about reliability and maintainability of software systems. Cognitive complexity measure based on cognitive informatics, plays an important role in understanding the fundamental characteristics of software, therefore directly affects the understandability and maintainability of software systems. In this paper, we compared available cognitive complexity measures and evaluated cognitive weight complexity measure in terms of Weyuker's properties.
